

# Your ring sizer

to print at actual size (without scaling)

## Important

To verify that your ring sizer has been printed at actual size, check that the credit card sized rectangle below measures the size of your credit card.

## How to measure your finger circumference?

### Step 1

Take a ring (an alliance for example) that you can put on the finger on which you will wear your new ring (the size of the fingers often varies from one hand to another).

### Step 2

Place the ring on the circles below. Your finger size corresponds to the circle whose black line appears entirely inside the ring, without you being able to see a gray background.

Note the number of the circle and select the size in our product detail page.
